Advanced mathematics for civil engineers
I. semester 2017/18

Neptun code: BMETE90MX33
Lecturers: Dr. Balázs Bárány & István Kolossváry

Midterm test:
There is one midterm test during the semester, which is 45 minutes long. It takes place on **October 30**, during the lecture.

The maximal score that one can get on the test is 60 points.

If someone failed on the midterm test or wants to increase the score, there will be one extra midterm test on **November 20**, during the lecture. I draw your attention that it is possible to decrease the score on the extra midterm test. That is, we consider only the score of the test, which was written later by the student.

There will be an extra test during the week **December 11-15** for those, who failed to get the signature for the semester (under special procedure fee). We advertise the exact time and place later.

Criterions for exam: The criterion for the exam is the signature for the semester. Those students can get the signature for the semester, who had at least 30% (i.e. 18 points) score on the midterm test.

Written exam: During the examination period there will be written exams. On a written exam the maximal score is 90 points. The minimum amount of points, which is required for a successful exam is 40% (36 points). The exam of the students, who couldn't achieve 36 points, is considered automatically inadequate.

For the midterm test and written exams, bring a prepared in advance *cover* made of A3 paper; with A4 *interior pages* (for work); *photo ID* (ID card, passport, student card, driving license etc.); *stationery* (pen etc.); *basic calculator* (which is capable for the four basic operations (+,- *, /) and for evaluation of elementary functions. It is forbidden to use calculators, which capable for matrix operations, integration and derivatives of functions, programmable or can connect to the internet.); and *the formula collection* which can be downloaded from the webpage.

The final degree is given by the sum of the midterm test and written exam score as follows:

- 74 inadequate (elégtelen (1))
75 - 89 adequate (elégséges (2))
90 - 104 moderate (közepes (3))
105 - 124 good (jó (4))
125 - 150 excellent (jeles (5))
