$$\underline{v}_1 = \frac{\underline{w}_1}{\|\underline{w}_1\|} \text{ and for } i = 2, \ldots, k \ \underline{v}_i = \frac{\underline{w}_i - \sum_{j=1}^{i-1}(\underline{v}_j \cdot \underline{w}_j)\underline{v}_j}{\|\underline{w}_i - \sum_{j=1}^{i-1}(\underline{v}_j \cdot \underline{w}_j)\underline{v}_j\|}.$$
