Course Requirements Mathematics A3

Code: BMETE90AX07

Instructor: József Mala, Dr.

email: jmala@math.bme.hu

homepage: https://math.bme.hu/~jmala/

Office hours: Wednesdays, 12:15-13:00, Room 510, building H

Faculty of students: Civil Engineering Faculty

Attendance: Being absent for more than 30% of the classes will result in denial of faculty signature regardless of the reason of missing those classes.

Tests: There will be two midterm tests.

First midterm test: during 6-th week, lecture time

Second midterm test : during 12-th week, lecture time

Make-up test: 13th week

Faculty signature: To get the faculty signature, besides the attendance requirements, the result of the midterm tests must be at least 30% each.

Make-up test. Any of them can be repeated during the make-up tests.

The results of the make-up tests overwrite the corresponding previous results. The only exception is when the student already has earned a signature but fails in the make-up test. In this case the student will get the minimum point possible with which he/she can get the signature.

References:

Boyce, W. E., DiPrima, R.C., Elementary Differential Equations , Wiley, New York, 2012, 10th ed.

Béla Barabás: Differential Equations (Note, Copy Center, Budafoki u. 13.)

Ross, S., A First Course in Probability, Prentice Hall, 1992.

Handouts are distributed occasionally.

Consultations: in office hours of the instructor. Further consultations will be annouced before the midterm tests.

Exam: No final exam can be taken without faculty signature. The final exam is a test which lasts 90 minutes.

Grading: Passing condition: final exam has to be at least 40%, further the following weighted final percentage must reach the 50%.

final percentage=0.4x(average of midterm tests)+0.6x(final exam)

If a student has the signature from previous year, then 30 points will be considered as the sum of his/her total midterm test points. However, by retaking both midterm tests, this can be improved (in this case this last result is regarded as the midterm result).

Final grade:
0-49 Fail (1)
50-61 Pass (2)
62-73 Satisfactory (3)
74-85 Good (4)
86-100 Excellent (5)
