

Publications by József Fritz; www.mtmt.hu/Fritz József

1. J. Fritz, *Information theory and thermodynamics of gas systems.*, Coll. Math. Societatis J. Bolyai 10. Information Theory, Debrecen 1967, 1968, pp. 167-175.
2. J. Fritz, *Entropy of point processes*, Studia Sci. Math. Hungarica **4** (1969), 389-399.
3. J. Fritz, *Generalization of McMillan's theorem to random set functions*, Studia Math. Sci. Hungarica **5** (1970), 369-394.
4. J. Fritz, *An approach to the entropy of point processes*, Periodica Math. Hungarica **3** (1973), 73-83.
5. J. Fritz, *On the characteristic properties of generalized entropy*, Problems of Control and Information Theory **1** (1972), 177-191.
6. J. Fritz, *An information-theoretical proof of limit theorems for reversible Markov processes*, Trans. Sixth Prague Conf. Information Theory, Statistical Decision Functions and Random Processes 1971, Academia, Prague, 1973, pp. 183-197.
7. J. Fritz, *On a pattern classification algorithm of R.L. Kashyap*, Problems of Control and Information Theory **2** (1973), 81-93.
8. J. Fritz, *Some remarks on a paper of J. McQueen on cluster analysis*, Coll. Math. Societatis J. Bolyai. European Meeting of Statisticians II., Budapest 1972 (. A. Ghani and I. Vincze, eds.), North-Holland, Amsterdam, 1973, pp. 199-209.
9. J. Fritz, *Stochastic approximation for finding local maxima of probability densitie*, Studia Sci. Math. Hungarica **8** (1973), 309-322.
10. M. Vajta and J. Fritz, *Some remarks on optimal choice of k of k-nearest neighbour density estimatio*, Per. Polytechnica E.E. **19** (1975), 113-125.
11. J. Fritz, *Learning from an ergodic training sequence*, Coll. Math. Societatis J. Bolyai 11. Limit Theorems of Probability Theory, Keszthely 1974 (P. Révész, ed.), North-Holland, Amsterdam, 1975, pp. 79-91.
12. J. Fritz and L. Györfi, *On the minimization of classification error probability in statistical pattern recognition*, Problems of Control and Information Theory **5** (1976), 371-382.
13. J. Fritz, *Distribution-free exponential error bounds for nearest neighbor pattern classification*, IEEE IT **21** (1976), 552-558.
14. J. Fritz, *Two optimization methods in nearest neighbor pattern classification*, Problems of Control and Information Theory **5** (1976), 227-238.
15. R.L. Dobrushin and J. Fritz, *Non-equilibrium dynamics of one-dimensional infinite particle systems*, Commun. Math. Phys. **55** (1977), 275-292.
16. J. Fritz and R.L. Dobrushin, *Non-equilibrium dynamics of two-dimensional infinite particle systems with a singular interaction*, Commun. Math. Phys. **57** (1977), 67-89.
17. J. Fritz, *Stochastic dynamics of two-dimensional infinite particle systems*, Journ. Stat. Phys. **20** (1979), 351-359.
18. J. Fritz, *An ergodic theorem for the stochastic dynamics of quasi-harmonic crystals*, Coll. Math. Societatis J. Bolyai 27. Random Fields, Esztergom 1979 (. J. Fritz and J.L. Lebowitz and D. Szász, eds.), North-Holland, Amsterdam, 1981., pp. 373-387.
19. M. Farkas and J. Fritz and P. Michelberger, *On the effect of stochastic road profiles on vehicles travelling at a varying speed*, Acta Technica Acad. Sci. Hungarica **91** (1980), 303-319.
20. J. Fritz, *Infinite lattice systems of interacting diffusion processes, Existence and regularity properties*, Z. Wahrscheinlichkeitstheorie verw. Gebiete **59** (1982), 291-309.
21. J. Fritz, *Stationary measures of stochastic gradient systems, Infinite lattice models*, Z. Wahrscheinlichkeitstheorie verw. Gebiete **59** (1982), 479-490.
22. J. Fritz, *Local stability and hydrodynamical limit of Spitzer's one-dimensional lattice model*, Commun. Math. Phys. **86** (1982), 363-373.
23. J. Fritz, *Some remarks on non-equilibrium dynamics of infinite particle systems*, Journ. Stat. Phys. **34** (1984), 539-557.
24. J. Fritz, *On the asymptotic behaviour of Spitzer's model for evolution of one-dimensional particle systems*, Journ. Stat. Phys. **38** (1985), 615-647.
25. J. Fritz, *On the stationary measures of anharmonic systems in the presence of a small thermal noise*, Journ. Stat. Phys. **44** (1986), 25-47.
26. J. Fritz, *Gradient dynamics of infinite point systems*, Ann. Prob. **15** (1987), 478-514.
27. J. Fritz, *On the hydrodynamic limit of a scalar Ginzburg-Landau lattice model. The resolvent approach*, Hydrodynamic Behaviour and Interacting Particle Systems (. G. Papanicolau, ed.),

- IMA Volumes in Mathematics and Its Applications 9., Springer-Verlag, New York, 1987, pp. 75-99.
28. J. Fritz, *On the hydrodynamic limit of a one-dimensional Ginzburg-Landau lattice model. The a priori bounds*, Journ. Stat. Phys. **47** (1987), 551-572.
 29. J. Fritz, *On the hydrodynamic limit of a Ginzburg-Landau lattice model. The law of large numbers in arbitrary dimensions*, Probab. Th. Rel. Fields **81** (1989), 291-318.
 30. J. Fritz and Ch. Maes, *Derivation of a hydrodynamic equation for Ginzburg-Landau models in an external field*, Journ. Stat. Phys. **53** (1988), 1179-1206.
 31. J. Fritz, *Hydrodynamics in a symmetric random medium*, Commun. Math. Phys. **125** (1989), 13-25.
 32. R.L. Dobrushin and Yu.M. Sukhov and J. Fritz, *A.N. Kolmogorov - the founder of the theory of reversible Markov processes*, Uspekhi Mat. Nauk **43:6** (1988), 167-188. (Russian)
 33. J. Fritz, *Hydrodynamic limit of a Ginzburg-Landau lattice model in a symmetric random medium*, Publication de l'Institut de Recherche Mathematique Avancee R.C.P. Strasbourg **25** (1989), 59-68.
 34. J. Fritz, *On the diffusive nature of entropy flow in infinite systems: Remarks to a paper by Guo - Papanicolau - Varadhan*, Commun. Math. Phys. **133** (1990), 331-352.
 35. J. Fritz, *Derivation of hydrodynamic equations from microscopic principles*, From Phase Transitions to Chaos (G. Györgyi-I. Kondor-L. Sasvári-T. Tél, eds.), Topics in Modern Statistical Physics, World Scientific, Singapore, 1992, pp. 567-579.
 36. J. Fritz and T. Funaki and J.L. Lebowitz, *Stationary states of random Hamiltonian systems*, Probab. Theory Rel. Fields **99** (1994), 211-236.
 37. J. Fritz, *Stationary states of FHP cellular automata*, Journ. Stat. Phys. **77** (1994), 53-66.
 38. J. Fritz *Stationary states of Hamiltonian systems with noise, On Three Levels* (M. Fannes, C. Maes, A. Verbeure, eds.), Plenum Press, 1994, pp. 203-215.
 39. J. Fritz and B. Rüdiger, *Approximation of nonlinear stochastic PDE by local mean field type lattice systems*, Nonlinear Stochastic PDE's, Hydrodynamic Limit and Burger's Turbulence (T. Funaki, W. Wojcinsky, eds.), IMA Volumes in Mathematics and Its Applications 77., 1995, pp. 111-126.
 40. J. Fritz and B. Rüdiger, *Time dependent critical fluctuations of a one dimensional local mean field model*, Probab. Theory Rel. Fields **103** (1995), 381-407.
 41. J. Fritz and C. Liverani and S. Olla, *Reversibility in infinite Hamiltonian systems with conservative noise*, Commun. Math. Phys. **189** (1997), 481-496.
 42. J. Fritz, *John von Neumann and ergodic theory*, The Neumann Compendium (F. Bródy and T. Vámos, eds.), World Scientific, Singapore, 1995, pp. 127-131.
 43. J. Fritz, *John von Neumann and Hydrodynamics*, The Neumann Compendium (F. Bródy and T. Vámos, eds.), World Scientific, Singapore, 1995, pp. 373-378.
 44. P. Collet and F. Dunlop and J. Fritz and T. Gobron, *Langevin dynamics of a semi-infinite interface*, Markov Processes and Related Fields **3** (1997), 261-275.
 45. J. Fritz and S. Roelly and H. Zessin, *Stationary states of interacting Brownian motions*, Studia Sci. Math. Hungarica **34** (1998), 151-164.
 46. J. Fritz, *An Introduction to the Theory of Hydrodynamic Limits*, Lectures in Mathematical Sciences 18., The University of Tokyo 2001, ISSN 0919-8140.
 47. J. Fritz, *Entropy pairs and compensated compactness for weakly asymmetric systems*, Advanced Studies in Pure Mathematics **39** (2004), 143-171.
 48. J. Fritz and B. Tóth, *Derivation of the Leroux system as the hydrodynamic limit of a two-component lattice gas*, Commun. Math. Phys. **249** (2004), 1-27.
 49. Fritz József, *Lax Péter tudományos munkásságáról*, Természet Világa (2005), 345-346.
 50. J. Fritz and Katalin Nagy, *On uniqueness of the Euler limit of one-component lattice gas models*, ALEA **1** (2006), 367-392.
 51. J. Fritz and Katalin Nagy and S. Olla, *Harmonic oscillators with conservative noise: Equilibrium fluctuations*, J. Statist. Phys. **122** (2006), 399-415.
 52. J. Fritz, *Hyperbolic scaling limits: The method of compensated compactness*, Markov Proc. Rel. Fields **16** (2010), 117-138.
 53. J. Fritz, *Application of relaxation schemes in the microscopic theory of hydrodynamics*, Moscow Mat. Journal **10** (2010), 729-744.
 54. J. Fritz, *Microscopic theory of isothermal elastodynamics*, Archive Rational Mech. Anal. **201** (2011), 209-249.

55. C. Bahadoran and J. Fritz and Katalin Nagy, *Relaxation schemes for interacting exclusions*, Electronic J. Probab. **16** (2011), 230–262.
56. J. Fritz, *Compensated compactness and relaxation at the microscopic level*, Ann. Math. et Informaticae **39** (2012), 83–108.
